

PRÉSENTATION DE L'OUTIL DE VEILLE

Feedly : un agrégateur de flux RSS

- Feedly est un outil de référence en matière de veille.
- L'outil permet de recevoir automatiquement, dans une interface simple et épurée, des contenus variés (articles, vidéos, podcasts...) provenant de sites externes.
- Dans le présent projet, deux catégories ont été créées :
 - Une catégorie propre aux spécificités du Menu Maker by Qwenta,
 - Une catégorie plus large dédiée au développement web.

Axe 1 - Création d'un flux autour du projet « Menu Maker »

The screenshot shows the Feedly interface for user Emmanuelle Rey. The left sidebar contains a list of feeds, with 'MENU MAKER BY QWENTA' highlighted in a red box. The main content area displays the feed's title and a list of articles. The right sidebar shows recommendations for other feeds.

Left Sidebar (Feeds):

- Emmanuelle Rey's Feedly
- Recently Read
- Feeds
- All (130)
- MENU MAKER BY QWENTA...** (51)
 - Auth0 (6)
 - Cloudflare (8)
 - Décodeur de cybersécurité (10)
 - MongoDB (11)
 - Node.js (6)
 - The Hacker News (10)
 - React Digest
- WEB DEVELOPMENT (79)
- Boards
- BOARD QWENTA
- Integrations & API
- Blog
- Learn & Get Support

Présentation de l'outil de veille Feedly | 4

Outil complémentaire : création d'un Board Feedly

Objectif : sauvegarder les articles / vidéos pertinents trouvés lors d'une veille active.

The screenshot displays the Feedly interface for a user named Emmanuelle Rey. The left sidebar contains navigation options: Today, Follow Sources, Create AI Feed, Search, Read Later, Recently Read, Feeds (All, MENU MAKER BY QWENTA, WEB DEVELOPMENT), Boards (BOARD QWENTA is highlighted), Integrations & API, Blog, and Learn & Get Support. The main content area shows a board titled 'BOARD QWENTA' with an 'Upgrade' button and a '+ Article' button. Below the board title, the 'Latest' section lists three articles:

- Auth0 in 100 Seconds // And beyond with a Next.js Authentication Tutorial** by BOARD QWENTA (FireShip / 46min). The article description states: "Auth0 is Authentication-as-a-Service used to manage the front door to your application. It provides drop-in user auth solutions that look great on any frontend app, and integrate..."
- Generate a PDF in React** by BOARD QWENTA (Colby Fayock / 47min). The article description states: "Generate a PDF from HTML using JavaScript in React and Next.js. Learn how to convert HTML to a PDF using 3 different tools including html2pdf.js that allows us to convert an HTML..."
- MongoDB vs MySQL : Quel est le meilleur système de gestion de base de données ?** by BOARD QWENTA (Kinsta® / 48min). The article description states: "Avec une variété de bases de données disponibles sur le marché, les utilisateurs se lancent souvent dans un débat sur MongoDB vs MySQL pour trouver la meilleure option. Les..."
